**Subject:** Immediate release of Environ's confirmation tests of independent testing.

Dear Sandra Lyon,

At last night's Board of Education meeting, when directly asked by a Board Member, Mr. Daugherty, from the district's hired environmental consultant, Environ, stated he has received test results confirming the accuracy of independent tests performed last year on PCB-laden caulking. The confirmation of these results validate that there is widespread and enormously high levels of PCBs (up to 370,000ppm) that violate federal law and currently are occupied by students and staff.

On behalf of the community and our organization, we are demanding a copy of those results be immediately released to the public, by end of day, March 20th, 2015.
